VISHAL GAJULA

+91 7386391450 | vishalgajula0709@gmail.com | Secunderabad, India
Portfolio | Vishal Gajula | Gajula Vishal | Vishal Gajula

Skills

- **Programming Languages:** JavaScript, TypeScript, Python, SQL
- **Backend Technologies:** Node.js, Express.js, FastAPI, Hono, REST APIs, WebSockets
- **Databases & ORM:** PostgreSQL, MongoDB, Prisma ORM, Database Design, Query Optimization
- **Backend Development:** Authentication, JWT, RBAC, API Design, Real-Time Systems, Data Validation
- **Developer Tools:** Git, GitHub, Postman, Cloudflare Workers, Vercel

Work Experience

- **Freelance Full Stack Developer** *06-2025 – 09-2025*
  Kadupuninda Restaurant – Meal Ordering Platform Secunderabad, India
  – Designed and developed **10+ REST APIs** for authentication, menu management, ordering, and customer workflows.
  – Reduced API response time by **~35%** through PostgreSQL query optimization and connection pooling.
  – Reduced authentication errors by **~90%** by restructuring JWT flows and role-based access control.
  – Decreased order-processing errors by **60%** through automated backend order-processing workflows and validation.

Projects

- **NoteLM – Advanced RAG Learning Assistant** *N/A*
  Technologies: Node.js, TypeScript, Next.js, OpenAI, Pinecone, PostgreSQL, Prisma, Inngest
  – Built backend ingestion pipelines supporting **5 source types** with automated parsing, chunking, and indexing.
  – Implemented **1536-dimensional embeddings** with Pinecone for semantic retrieval across indexed knowledge sources.
  – Retrieved top-**6 relevant chunks** per query to provide context-grounded responses from indexed documents.
  – Integrated asynchronous processing with Inngest for reliable document ingestion and background task execution.
- **Persona AI – Persona-Driven Agentic Chat Platform** *N/A*
  Technologies: Node.js, TypeScript, Express.js, OpenAI GPT-4o-mini, YouTube API [] [link]
  – Built an agentic backend pipeline with **4 core stages** for contextual reasoning and response generation.
  – Implemented dynamic system prompts supporting **2 AI personas** with distinct behavior and response characteristics.
  – Integrated **3+ external tools and APIs** for contextual retrieval and creator-specific content processing.
  – Implemented SSE streaming for incremental responses, reducing perceived response latency during conversational requests.
- **Delish – Ready Restaurant Ordering System** *N/A*
  Technologies: Node.js, Cloudflare Workers, Hono, Prisma, PostgreSQL, WebSockets [] [link]
  – Designed and developed **10+ REST APIs** for authentication, menu management, ordering, and customer workflows.
  – Reduced API response time by **~35%** through PostgreSQL query optimization and connection pooling.
  – Reduced authentication errors by **~90%** by restructuring JWT flows and role-based access control.
  – Decreased order-processing errors by **60%** through automated backend order-processing workflows and validation.

Education

- **Malla Reddy Institute of Engineering and Technology** *2022 – 2026*
  B.Tech in Computer Science and Engineering | CGPA: 8.2/10 Secunderabad, India
  – Coursework: DSA, OOPs, DBMS, Software Engineering, Web Development

Certifications

- **100xDEVS MERN Development** *2025*
- **Technothon 2.0 Participant** *2025*
